# KWoC Project Report-Alchem

- ## Why I participated in KWoC?

  Although i had idea about how git works , but i never worked on a project in git and I always wanted to contribute to open source projects. As soon as i came to know about KWoC, i didn't choose project just to know new technologies but to work along with other developers to contribute to open source.

- ## Choosing a project

  This depends on why one wants to participate in KWoC. I was only interested in contributing to open source so i choose a project developed on technologies i already know. I choose **ALCHEM DESKTOP,** which is a accounting application for chemists developed in java.

- ## Contributing to project

  **1<sup>st</sup> commit- Added logout option( <span style="color:blue">__Github Link__</span> ):**
  There was no logout option in application, so i added logout button in the settings drawer.

  ## [FEATURE]Added logout option in settings drawer #24

  **Merged**  vipul-goyal merged 3 commits into `alchemsynergy:master` from `anirudhreddy1997:master` 20 days ago

  | 🗨 Conversation  0 | ⊶ Commits  3 | 🗐 Files changed  3 |
  | --- | --- | --- |

  Changes were made in settings.fxml file to add logout button.
  Its functionality is added in settingsdrawercontroller.java file.

**2<sup>nd</sup> commit- Addresses the issue in searching in inventory ( Github Link ):**

[FIX] First letter is not searched in Inventory the first time anything is searched #25
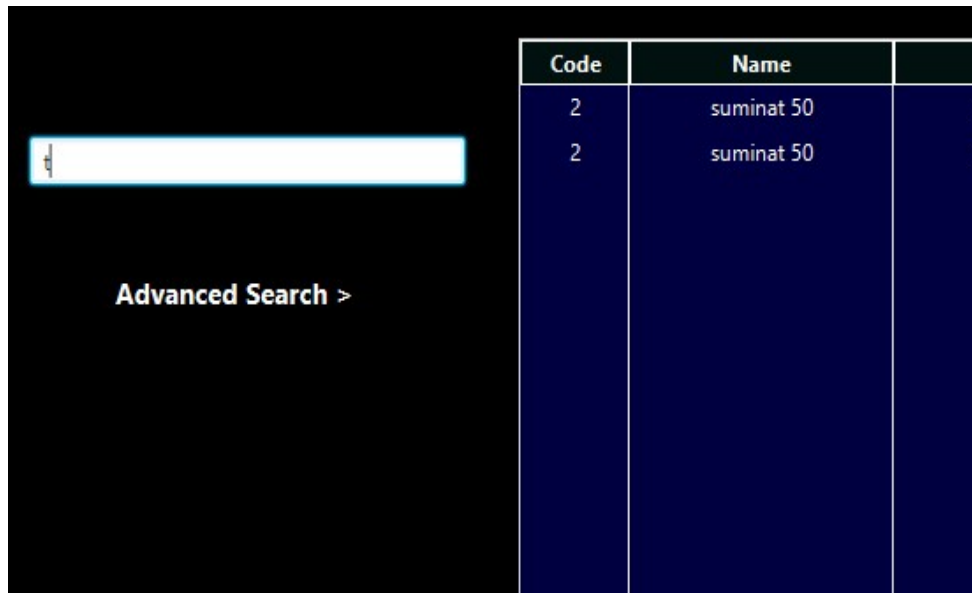

**Merged**   techfreakworm merged 1 commit into `alchemsynergy:master` from `anirudhreddy1997:bugfix18`  12 days ago

Conversation  1      Commits  1      Files changed  1

To remove this issue function called by search field is changed in InventoryController.java file

**3<sup>rd</sup> commit- Changed the functionality of navigation drawer**

**( Github Link ):**

MainStageController.java file is changed to open settings drawer even though user drawer was opened. Before one drawer cannot be opened when other drawer was opened already.
